

Damp proofing around meter boxes

(Withdrawn – January 2024)

The Technical Guidance Notes are produced by NHBC as guidance solely for our builder customers as to how to interpret the technical requirements in relation to the warranty cover provided by NHBC under its Buildmark, Buildmark Choice, Buildmark Link, Buildmark Solo, Buildmark Connect or any similar product from time to time. It has not been created or intended for distribution or use outside of that purpose. The information contained in this Technical Guidance Note does not constitute advice and is not to be relied upon by any third party. Nothing in this Technical Guidance Note is intended to, nor should it be taken to, create any legal or contractual relationship. Any third party who chooses to rely upon the information contained in the Technical Guidance Notes shall do so entirely at their own risk and NHBC accepts no duty of care or liability, however caused, in connection with its use or reliance by any third party.

Question

Can polythene bubble sheet cavity insulation be used instead of providing a cavity tray over and a dpm behind a meter box?

Considerations

- NHBC Standards clause 6.1.17 refers to cavity trays and dpms around meter boxes to prevent moisture penetration.
- Polythene bubble sheet cavity insulation acts as an effective dpm.

Answer

Where polythene bubble sheet insulation is being used over the whole wall area, it can be used to prevent moisture penetration around meter boxes instead of providing a cavity tray and dpm. It is not a satisfactory alternative to a cavity tray and dpm in other situations.
